Oatle Kids

PayFast merchant policy pack

This pack contains the Terms and Conditions, Privacy Policy, Refund Policy, Cancellation Policy and Digital Delivery Policy for the Oatle Kids monthly digital subscription.

Merchant	Ntombizodwa Moekwa, trading as Oatle Technologies
Product	Oatle Kids
Price	R99 per month (ZAR)
Country	South Africa
Website	https://www.oatlekids.co.za/
Contact	info@oatle-technologies.co.za
Effective date	22 October 2026

Terms and Conditions

1. Product

Oatle Kids is a digital, parent-guided learning product for ages 2-7, with reading, word building, sentence building, maths, writing and tracing activities. It is not a school, formal assessment, medical service or replacement for professional learning support.

2. Parent accounts

The purchasing account holder must be at least 18, keep login details confidential and supervise a child's use. Children should not submit personal information.

3. Subscription and payment

Access costs R99 per month in ZAR and renews monthly until cancelled. Creating an account does not create a charge. PayFast processes payment; Oatle Kids does not store full card details.

4. Acceptance

Before checkout, the parent must affirmatively accept these terms and the Refund, Cancellation, Delivery and Privacy Policies. The recurring price is displayed before payment.

5. Delivery

Digital access is activated on the parent account after successful payment confirmation, normally immediately and within 30 minutes.

6. Cancellation and refunds

Cancellation stops future renewals and access continues until the paid period ends. The first payment may be refunded when requested within seven calendar days. Statutory rights remain unaffected.

7. Use and intellectual property

Access is for personal household use. Users may not resell access, bypass controls, interfere with the service or copy and redistribute substantial product content. Oatle Technologies retains ownership of its software, artwork, activities and branding.

8. Availability, liability and law

Services may require maintenance or change. Nothing excludes rights or liability that cannot be excluded by law. South African law governs these terms.

Privacy Policy

1. Responsible party

Ntombizodwa Moekwa, trading as Oatle Technologies, is responsible for Oatle Kids personal information. Privacy requests may be sent to info@oatle-technologies.co.za.

2. Information

We process parent email and authentication records, subscription and access status, payment references, essential technical logs, device-stored preferences and voluntarily submitted AI questions. Full payment card details are handled by PayFast.

3. Children

Parents purchase and manage Oatle Kids. We do not ask children to create accounts and do not intentionally collect children’s names or contact details.

4. Purpose

Information is used to secure accounts, provide access, deliver activities, support users, prevent misuse, improve reliability and meet legal obligations.

5. Providers

Service providers include Supabase for account and access services, Vercel for hosting, PayFast for payments and Cloudflare for the AI assistant.

6. Sharing and retention

Personal information is not sold. It is shared only as needed with providers or when lawfully required. It is retained only as long as needed for service, legal, accounting and dispute purposes.

7. Rights

Subject to POPIA, individuals may request access, correction or deletion, object to certain processing, withdraw consent where relevant, or complain to South Africa’s Information Regulator.

Refund Policy

Seven-day first-payment refund

A parent may request a full refund of the first subscription payment within seven calendar days after payment by emailing from the parent account address.

Renewals

Renewal payments are normally non-refundable after the new digital-access period begins. Duplicate charges, incorrect amounts, unauthorised payments and undelivered paid access will be investigated and corrected.

Service problems

If confirmed payment does not activate access within 30 minutes, the parent should contact support. If access cannot be restored in a reasonable period, an appropriate refund, extension or credit will be provided.

Payment method

Approved refunds are submitted through PayFast to the original payment method where possible. Provider and bank processing times apply.

Consumer rights

This policy does not limit rights or remedies available under South African law.

Cancellation Policy

How to cancel

Email info@oatle-technologies.co.za from the parent account address with the subject ‘Cancel my Oatle Kids subscription’. This is the official method until self-service cancellation is available.

Timing

Requests should be sent before the next renewal date. Oatle Technologies will acknowledge the request and stop future recurring charges.

Access

Cancellation stops future renewals. Access remains active until the end of the billing period already paid for.

Refunds

Cancellation does not automatically refund a completed charge. The seven-day first-payment rule and payment-error cases are handled under the Refund Policy.

Confirmation

The parent should retain the confirmation email and follow up if no acknowledgement is received within two business days.

Digital Delivery Policy

Delivery mode

Oatle Kids is delivered electronically. No physical product is shipped. Paid access is linked to the parent account.

Delivery time

Access is normally immediate after successful PayFast confirmation and may take up to 30 minutes.

Requirements

A modern browser and internet connection are required for signup, login, payment and access checks. Current access is through the website; App Store and Google Play apps are marked coming soon and are not included in the present purchase.

Missing access

The parent should sign out, sign in with the purchasing email and contact support with the payment date and reference if access remains unavailable. Passwords and full card numbers must never be emailed.

Failed or pending payments

Access is not delivered for failed, cancelled or unconfirmed payments. Pending payments are handled after PayFast provides a final status.

Territory and currency

The merchant is domiciled in South Africa and the subscription is charged in South African rand.
